### ADDED VALUE OF OUR TEAM

Best ever safety  
performance

Artelia Philippines achieved another milestone of 5 million manhours without Significant Incident and Fatality (SIF) in our Shell Mobility Capex Program.

The milestone was attained at the end of year 2022 while completing a record number of mobility stations in the same year. We have kept safety as a priority while ensuring that the construction activities are done in a timely manner and within the client's standards.

Workers across various sites in the Philippines stayed safe in the course of our operations. Artelia upholds the Golden Rules of Compliance, and Intervention & Respect for People in its continuing quest towards Goal Zero – a vision committed to a strong culture where no one gets hurt.

In collaboration with L1 (Shell – client side) and L3 (contractors), the number of SIFs decreased remarkably and helped us achieve our best ever safety performance.
